WORK EXPERIENCE

Foresight

Software Development Intern

Aguascalientes, México

March 2026 – Present

- Built web interfaces with React and cross-platform mobile applications with React Native for internal enterprise tools.
- Designed and consumed REST APIs to connect client applications, backend services, and databases.
- Developed Node.js agents to monitor equipment status and log operational data in real time.
- Administered and queried MySQL databases to manage users, equipment records, and internal processes.
- Contributed to internal system improvements for inventory management, traceability, and operational control.
- Supported automation, testing, and deployment of solutions across enterprise environments.
- Assisted with Active Directory administration and internal access management.

Key Depot

Software Development Intern

Aguascalientes, México

November 2024 – August 2025

- Developed and maintained websites using Angular v19 and WordPress, following software development best practices.
- Implemented backend functionality in PHP, connecting applications to MySQL databases via phpMyAdmin.
- Integrated automated bots using N8N and Webhooks to streamline internal business processes.
- Verified electronic payments through the Openpay BBVA platform.
- Provided technical support and contributed to continuous improvement of existing systems.
